

Blanket Purchase Agreement for Bureau of Land Management/Forest Service Technical Advisory Services

The BLM/FS Technical Advisory Services Basic Purchase Agreement (BPA) provides federal agencies with the ability to access a wide range of services at minimum cost and effort, including engineering, scientific, and technical services to support the land management efforts of the requesting agency. Services available under this BPA will be related to hazardous materials, abandoned mine lands, physical and other hazard responsibilities primarily in the States of Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, and Wyoming. The Southwestern Region of the Forest Service is responsible for National Forests in New Mexico and Arizona.

THE SAIC TEAM

The SAIC Team includes Golder Associates, Tecumseh Professional Associates, Inc., and ICRC, Inc. A brief description of each company's qualifications and experience is provided in the boxes below. Services provided by the SAIC Team for each Task Order under this BPA will follow all applicable federal statutes, policies and procedures. In addition, all labor, tools, materials, equipment, and any other items and services necessary to complete the Task Order will be included. Specific services available under this BPA are:

- Project Support
- Technical Evaluations and Expert Witnesses
- Audits and Assessments
- Cost-Estimating Handbooks
- Information Line
- Site Investigations and Reports
- Project Management Plans
- Community Relations Plans
- Cost Recovery and Litigation Support
- Natural Resource Damage Activities
- Other Agency Support
- Computer Modeling
- National Environmental Policy Act
- Other Activities, including various studies or tasks

SAIC is the nation's largest employee-owned research and engineering company, providing environmental and engineering services to commercial and government customers. We provide expertise in all service areas required in the BLM/FS SOW, including hazardous materials, abandoned mine lands, landfills, and other physical and safety-related areas, and have completed similar projects in all the states listed. SAIC has provided comprehensive hazardous waste investigation and remediation services to the Forest Service, Regions 2 and 4 (CA, CO ID, KS NB, NV, SD, UT, and WY) for the past 7 years. We have extensive experience in the CERCLA fast track approach to site investigations and remediation of abandoned mine lands, and have developed screening processes that allow us to move forward with quick, inexpensive remedial designs at certain sites. Finally, we provide excellent program management and strong geographical coverage, with offices in nearly all states detailed by BLM/FS.

Tecumseh provides over 100 professionals with education and experience in engineering, environmental sciences, regulatory compliance, law, mining, oil and gas, natural resource planning, real estate planning, business administration, and general contracting in AZ, NM, and UT. Tecumseh is a Native American, SBA 8(a) certified small business, with technical expertise in environmental, energy, facility operations, and real estate industries providing clients with high-quality technical, management, contracting, and planning services. Tecumseh is headquartered in Albuquerque, NM, with offices in Boston, Atlanta, and Washington DC.

Golder provides additional resources and geographic depth and excellent remedial design and engineering expertise for abandoned mine lands and landfill projects. Golder is a global group of companies providing mining and geotechnical engineering and environmental science services. In the BLM/FS project states, Golder provides local resources and knowledge combined with the ability to call on national expertise, if necessary. Golder has over 700 highly qualified professional engineers, hydrogeologists, geophysicists, geologists, environmental scientists, chemists, planners, information managers and construction managers.

ICRC provides environmental and engineering expertise in site characterization, permitting, NEPA, environmental compliance and auditing, remedial design, construction oversight, health and safety training, cultural resources, and natural resources in Alaska. ICRC is an Alaskan Native Corporation subsidiary and a SBA 8(a) certified small business. Located in Anchorage, Alaska, ICRC staff has extensive experience in performing environmental projects throughout Alaska. ICRC understands the local working conditions and issues, the availability of resources and equipment within the State, applicable technologies for local conditions, and local and federal regulatory expectations.
